PROFILE SUMMERY

I'm a fourth-year student at Norton University with Computer Science Major. I was interested in Web Developer at the end of 2020. At that time, I saw a video tutorial on Youtube teaching Javascript and CSS. Their Structure is much different from what I've learned at the university. Mostly I was learning only about Java, C#, etc. In 2021, I started learning HTML, CSS, and Javascript on any platform such as Udemy, FreeCodeCamp, W3School, Youtube, and so on. I feel so happy with it and start learning more and more. I've also built some projects to practice my coding skills. I'm good at researching and critical thinking. The quote that I always tell myself is: If I want it, I'll do it until I got the result no matter what. I spent most of my time learning code and keep on researching, and now I'm looking for an internship to gain experience

EDUCATION

2006 – 2012 : Graduate from primary school at Sonthormok

2012 – 2015 : Graduate from secondary school at Sonthormok

2015 – 2018 : Graduate from high school at Sonthormok
